Operations Assistance

Project Overview

Direct line management responsibility to the Curragh Queensland Mining Pty Ltd (CQMPL) General Manager for the auditing, construction, pre-commissioning, commissioning and handover of the Coal Fines Upgrade project.

This project encompassed the following:

Stage I

Brownfield demolition works, installation of Jameson (floatation) cells and associated coal handling circuit upgrade (eg. coal thickeners, launders, overflow tanks, pipe work, support structures, MCC / substation, control system modifications, instrumentation and electrical work).

Stage II

Horizontal Vacuum Belt Filter installation (122 m²), additional Jameson Cells and associated circuit upgrade.
