Reporting and Cost Control  
Logistics Material Tracking (AssemblyBASE)  
Quality Control & Assurance Management  
Management of Third Party Inspectors

## Project Overview

Following a number of issues with supplier delivery, the IPS Site Management team took on the role of fabrication logistics management.

The IPS Site Project and Construction Management team then completed site erection of the delivered structural steelwork.

A total of 2700 tonnes of structural steel was fabricated in two facilities to meet the requirements of the construction schedule.
