

### Location

80 kms south-west of Kangerlussuaq,  
South West Greenland

### Client

New Millennium Resources NL

### Total Project Value

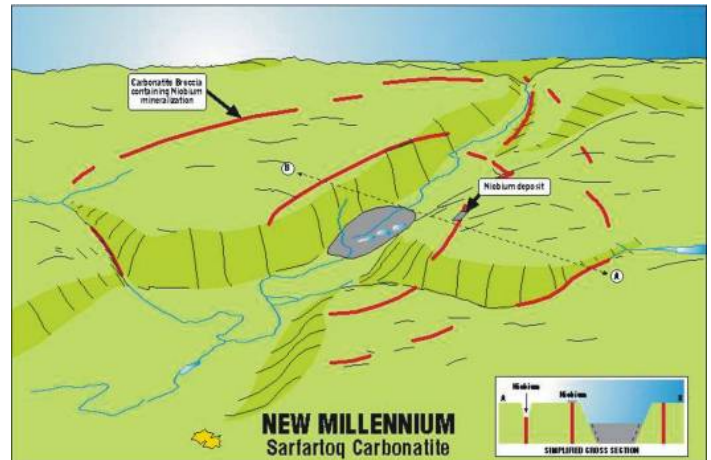

US \$40 Million (estimated)

### Role

Client Representative  
Project & Study Management (2000 – 2002)

### Services Provided

Stage I Feasibility Study completed (July 2000)  
Evaluation of Project Sites  
Project & Study Management  
Project Cost Estimating  
Site Baseline Environment & Archeology Field Work  
Planning and Scheduling  
Bankable Feasibility Study  
Site (Northern) summer 2001 Drilling Programme  
AIM (London) Listing Requirements  
Marketing Plan and Off-Take Agreement  
Liaison with Greenland and Danish Governments and Statutory Organisations

### Project Overview

Completion of a Stage I Feasibility Study incorporating a review of all project elements, including; project status and overview, geology and ore reserves (measured and inferred resource), mining philosophy and preliminary mine plan, preliminary process configuration and options, infrastructure and logistics requirements, project construction / site erection options (eg. Modularization), marketing issues, environmental impact statement, capital and operating cost estimates, status of approvals processes and agreements, development and management plan, use of funds strategy, critical project risks and the development of a preliminary financial model and sensitivity analysis.

Currently planning the scope and funding requirements for a Bankable Feasibility Study and the requirements for a future AIM (London) listing.

Planning, scope definitions and costings for the site (Northern) summer 2001 drilling and geology programme.
